Horizontal Slider

3-Season Vinyl Glass Sunroom

Also known as a 3 Season sunroom, vinyl glass functions similarly to a screen room but with the added option of closing off the space to outdoor elements. Full screens are placed behind each window panel to allow for ventilation. A vertical 4 track panel allows for 75% ventilation into the room and horizontal slider allows 50%.

Vertical 4 Track

When the vinyl window panels are closed, the room is protected from rain, pollen, dirt, and debris.

These outside elements are typically what frustrates homeowners who have existing screen rooms since they tend to be dirty and in need of regular cleaning.

Eze-Breeze® Vinyl Glass is extremely durable. The flexible material is transparent and returns to its original shape if hit or distorted.

Eze-Breeze® Vertical 4 Track

Vinyl glass sunrooms tend to be less expensive than glass sunrooms and carry a 10-year manufacturer warranty. Vinyl glass window panels are easy to keep clean.

4-Season Insulated Glass Sunroom

A glass sunroom is more of a room addition that can be cooled and heated year-round to give it a 4 Seasons appeal. A 4-season insulated glass sunroom adds square footage to your home. Custom energy efficient windows with Low E and Argon gas are installed above a solid insulated knee wall or a glass knee wall. Choose from beautiful fixed lite windows and doors, horizontal sliders, or double hung windows to customize your space.

Customize Your Sunroom

NRG sunrooms are designed and engineered to meet and exceed all requirements for wind loads and building codes.

Insulated roof panels can be fitted with internal fan beams intended to run hidden electrical wiring and mount light fixtures and fans.

Electricity can be installed by a licensed electrician to provide outlets and fans.

Door Options

The PGT Cabana Door is the ideal companion to all of our PGT Eze-Breeze products. Vertical 4-track Cabana door panels offer 75% ventilation. In other words, three of the lightweight, vinyl-glazed panels can be easily raised or lowered over the fourth to create an outdoors feel. Or remove and store the panels – leaving the screens in place – for 100% airflow. Full View Cabana door offers an unobstructed view from inside or outside your sunroom.
